Education

B-Tech InformationTechnology

2023-2027

KPR Institute of Engineering and Technology, Coimbatore
(honors in FullStack Development)

CGPA: 8.53/10

Higher Secondary School (12th)

82 %age

Physics, Chemistry, Biology & Computer

High School (10th)

85 %age

Work Experience

PiyushDhara Eduverse | WebSite Developer Intern | 01 October 2025 - 01 January 2026

Developed and deployed a full stack website for user and admin :

UserWebsite: www.piyushdhara.com

AdminWebsite: www.admin.piyushdhara.com

Projects

Project-1: CDC - Placement Cell Management System

Implemented secure JWT-based authentication and role-based access control for multiple user roles (admin, students).

Implemented file upload functionality with Cloudinary for resume and document management.

Built a responsive admin dashboard with data visualization using Chart.js for placement statistics and analytics Created real- time notification system for job applications, interview schedules, and placement updates

Github: <https://github.com/Official-Vinit/CDCWork>

Project-2: SmartCart - Customer Sugmentation System

Developed an end- to end customer segmentation system using different algorithms in unsupervised learning.)

Implemented evaluations to check the correctness and anamoly detection

Github: <https://github.com/Official-Vinit/SmartCart-Customer-Segmentation.git>

Project-3: Stolker - Stock Trading Web App

Developed secure RESTful APIs using Node.js, Express, and MongoDB (Mongoose)

Enabled CORS for safe cross-origin requests and integrated environment-based configuration.

Designed modular, scalable code structure with robust error handling.

Github: <https://github.com/Official-Vinit/zerodha>

Project-4: PowerPlant Energy Prediction - ANN System

Architecture: Implemented a multi-layer ANN with ReLU activation and MSELoss to optimize performance.

Performance: Achieved a high R² Score of 0.93 on test data, effectively capturing non-linear relationships.

Optimization: Utilized the Adam optimizer and implemented a "best model" save/load checkpoint strategy.

Github: <https://github.com/Official-Vinit/ANNRegression>

Skills & Achievements

- **Programming Languages:** Python, Java, JavaScript, C/C++
- **Machine Learning**
- **Full Stack Development:** MERN Stack
- **System Design**
- **API Handling**
- **Deployment:** Amazon AWS, Render, Vercel
- **Databases:** MySQL, MongoDB

Achievements & Certifications

- [MongoDB Certified Associate Developer](#)
- [AWS Academy Cloud Foundation Certificate](#)
- [5star at problem solving \(HackerRank\)](#)
- 200+ on Leetcode
- [JavaScript Algorithms and Data Structures](#)
- [Problem Solving in C](#)
