+919621030649

Professional Summary

Full Stack Developer with hands-on experience in the MERN stack and Android ecosystem. Proven ability to deliver production-level code through internships and comprehensive projects. Adept at Data Structures and Algorithms and eager to contribute to scalable software solutions.

Education

B-Tech Information Technology

2023-2027

(honors in Full Stack Development)

CGPA: 8.49/10

KPR Institute of Engineering and Technology, Coimbatore

Work Experience

PiyushDhara Eduverse | WebSite Developer Intern | 01 October 2025 – 01 January 2026

Developed and deployed a full stack website for user and admin :

User Website: www.piyushdhara.com

Admin Website: www.admin.piyushdhara.com

Projects

Project-1: Placement Cell Management System

- Implemented secure JWT-based authentication and role-based access control for multiple user roles (admin, students).
- Implemented file upload functionality with Cloudinary for resume and document management.
- Built a responsive admin dashboard with data visualization using Chart.js for placement statistics and analytics. Created real-time notification system for job applications, interview schedules, and placement updates
- Github: <https://github.com/Official-Vinit/CDCWork>

Project-2: CampusConnect Social platform for Campus Community

- CampusConnect2 is a full-stack web application designed to foster engagement and communication within a campus community. It enables users to create posts, participate in polls, comment, react, follow others, and manage their favorite content. The platform features user authentication, profile management, and interactive sidebars for news and chatbot assistance.
- Post Creation & Management
- Comments & Replies.
- Upvote/Downvote And many more...
- Github: <https://github.com/Official-Vinit/CampusConnect2>

Project-3: Stock Trading Web App

- Developed secure RESTful APIs using Node.js, Express, and MongoDB (Mongoose)
 - Enabled CORS for safe cross-origin requests and integrated environment-based configuration.
 - Designed modular, scalable code structure with robust error handling.
 - Developed a real-time data pipeline by integrating the backend API with frontend dashboards.
 - Github: <https://github.com/Official-Vinit/zerodha>
-

Skills & Achievements

- **Programming Languages** Java, Kotlin, JavaScript, C/C++, Python
- **Web Development** HTML, CSS, JavaScript, React.js, Node.js, Express
- **Android Development** Kotlin, Jetpack Compose, Retrofit, Coil
- **Databases** MongoDB, MySQL, Room
- **Testing(JEST)**
- **System Design**
- **API Handling**
- **Deployment** Amazon AWS, Google Cloud, Render, Vercel
- **Learning Machine Learning**

Achievements & Certifications

- [MongoDB Certified Associate Developer](#)
- [AWS Academy Cloud Foundation Certificate](#)
- [5star at problem solving.\(HackerRank\)](#)
- [100+ on Leetcode](#)
- [JavaScript Algorithms and Data Structures](#)
- [Problem Solving in C](#)
